PARANOID ANDROID

WHAT IF...AN ANDROID HAS A BUG?

After a mission on Mars, you await the moon landing with trepidation. As usual androids are dismantled after their return, to prevent them from starting to suspect their nature...but thanks to a bug one of the androids understood his nature, he became aware of his forthcoming doom and decided to act. He needs to understand if and how many of his kind are in the crew and let humans end up badly. Never trust a human!!!

An Android has discovered his true nature and is sowing panic inside the spaceship

No one on board is sure of his identity and must find out to figure out who is Human and who is Android

If you are Android, try to increase Paranoia among Humans and thus avoid being dismantled

If you are Human, make the conscious Android reveal itself and restore order aboard the spaceship

4-6   10+   45'

COMPONENTS:
- 2 Board
- 7 Pawn
- 84 Cards
- 108 Token
